

A close-up photograph of a man with dark hair and a beard, looking down at a sleeping baby. The baby is lying on its side, facing right, with its eyes closed and mouth slightly open. The man's hand is visible near the baby's head. The background is softly blurred.

Your child *looks* healthy.  
Isn't that enough?

## Health problems can be hidden.

Some problems can lead to permanent disability if left untreated. The earlier health problems are found, the easier it is to correct or stop them. Well child check-ups are important, even when children are healthy. Well child check-ups will help keep your child healthy. Call your child's primary care provider and schedule a well child-checkup.

If your child is covered by Medicaid,  
the exams are FREE!

For more information,  
call 800-362-8312  
or go to [www.mtmedicaid.org](http://www.mtmedicaid.org)

**Just because your children are  
not sick does not necessarily  
mean they are healthy.**

**Schedule a visit with your child's  
primary care provider today.**

Montana Medicaid and the Early, Periodic,  
Screening, Diagnosis and Treatment  
(EPSDT) program will ensure your child's  
health for years to come.

Even the most caring parent couldn't see it.

Hearing loss

Lead poisoning

Heart defect

# Well Child Check-ups

Free  
Medicaid  
Check-up!

Regular "well child check-ups" help detect serious and life-threatening conditions and developmental problems that can only be found with special screening.

The check-up is free if your child is covered by Medicaid.

So, don't delay. Even if you can't see anything wrong, you *can* see that your child has a Well Child Check-up.

Find problems *before* they become serious. Call your doctor today to schedule an appointment.

For more information,  
call 800-362-8312  
or go to [www.mtmedicaid.org](http://www.mtmedicaid.org)

# Healthy children learn better!

Call your child's primary care provider to  
schedule a well child check-up.  
For children in Montana Medicaid, it is at no cost!
